

Hello and Good Day,

If you are reading this, you must also have a copy of my resumé in your possession as well. As you can see, for the last ten years (plus) I have been the owner/operator of my own shops.

In running my own businesses, I have commonly dealt with every aspect of the PC computer, from building custom systems, diagnosing malfunctioning equipment, cleaning up a virii/spyware infected MS Windows machines to putting in scalable linux router/gateway/firewall machines for businesses networks.

There is very little in the PC environments that I have NOT dealt with now, from 10/100/1000 wired networks, secured wifi networks (A thru N), all the common peripherals, Microsoft Windows from 2.x to Vista, HPUX thru linux.

I'm an 'old school' taught individual, meaning that the quality of my work and my customer relations MATTER to me. This is something that I will not compromise on, now or in the future. I believe in the 'Do it right the first time and you don't have to do it again' philosophy. Subsequently, if you/your firm is looking for someone of caliber with an extensive working knowledge of computers/peripherals/networks/customer service relations, then I am someone to consider. While I don't (at this time) carry any of the Microsoft certifications, I see no reason why I couldn't, if the need arose, acquire them.

Respectfully Submitted,

G. L. `Griz' Inabnit

**OBJECTIVE:** Computer Repair, Maintenance, Construction & Troubleshooting.

**QUALIFICATIONS:**

Areas of Expertise:

- Microsoft Windows systems setup and troubleshooting.
- Linux installs, configuration and troubleshooting.
- Network setup and diagnostics, including ethical hacking.
- Operational training (Windows 3.x thru Vista, DOS 3.x thru 6.22, word applications, dbase applications, minor spreadsheet applications.
- Computer troubleshooting, repair, configuration, programming, sales and installations.
- Systems analysis and consulting
- Assembly/high level/4<sup>th</sup> generation language programming.
- Application initializations, customization and modifications.
- Excellent assimilation of new packages, follow through and public relations

Hardware and Operating Systems:

- IBM clones/compatibles {8080A thru quadcore xeon & 64bit processors} under Microsoft Windows, MS-DOS, OS/2, Unix and Linux.
- Tandy-NEC-Zenith-Linear 8080A-current
- Hewlett Packard under MPE-UB-2
- Xerox Sigma 9 under CP-V
- IBM System 36 under OS5360
- DEC PDP-11 under RT-11
- UYK-20 under Unix

Languages/Tools

- Winternals ERD Commander
- Microsoft Windows 3.x thru Vista
- Microsoft Office Suite (including Word & Excel)
- OpenOffice Suite 1.x thru current
- Dbase III, III+ and IV
- Word Perfect 4.2 thru 10
- Diagnostic, antivirus, spyware removal tools too numerous to list (both in MS and \*nix environments)

**EXPERIENCE:**

Owner/Operator 2004-2007

Custom Built Computers of Redmond, INC.  
Redmond, Oregon

Fabrication, troubleshooting, repairing and customization of computer systems, peripherals and networks, from 80386 processors to high-end quad-core Xeon and AMD64 systems. Private and group instruction of computer literacy to high level programming. Familiar with most major business software packages. Expert use of MS-DOS version 2.x thru 6.22, OS2 2.x thru 4.0, Unix and Linux. Proficient with numerous diagnostic packages.

Service Manager 2001-2004

Custom Computer Concepts  
Redmond, Oregon

Supervised and scheduled all technicians in diagnostics, troubleshooting, ordering, and customer relationships. Fabrication, troubleshooting, repairing and customization of computer systems, peripherals and networks, from 80386 processors to high-end Pentium and AMD processors.

Owner/Operator 1989-2003

Outcast Computer Consultants  
Redmond, Oregon

Freelance computer consultant working for both home owners and small businesses. Fabrication, troubleshooting, repairing and customization of computer systems, peripherals and networks, from 80386 processors to high-end Pentium and AMD processors.

**MILITARY:**

Cryptologic Technician 1978-1982

U.S. Navy

Responsible for the collection, encoding and transmission of highly sensitive data and communications utilizing on-board mainframe systems, high-frequency receivers and related classified equipment requiring a TopSecret-Sensitive Information clearance.

**EDUCATION:**

Computer Repair Technician, State of California

U.S. Navy Cryptologic Technician (A, B and C schools)  
Technician Rating and Equipment Certification

Bozeman Senior High School graduate, Class of 1976  
Bozeman, Montana
